**Key Duties and Responsibilities**

This CNS is a registered nurse who has extensive experience and clinical expertise Nephrology nursing. The role will encompass a major clinical focus (direct & indirect) comprising of assessment, planning and delivery of patient care that is done in collaboration with medical and other healthcare professionals.

The management of patients with Chronic Kidney Disease (CKD) and other Renal conditions demands a broad range of professional skills and knowledge, as well as skills in communication, leadership, teaching, education, research and counselling. The CNS will have the expertise and specialist knowledge to incorporate these skills into practice and so develop standards of care that benefit the patient. In so doing, the CNS will embrace the five core concepts of the clinical nurse specialist role to ensure the provision of a high quality holistic service for the patients in need of the service, and to enhance the health status of this patient population.
Clinical Focus

- To provide specialist knowledge, expertise and care to patients with Chronic Kidney Disease and other Renal conditions. This will be at a higher level of autonomy and decision-making in patient management as defined by protocols.
- To assess, plan, deliver, and evaluate care to patients and their families, in the inpatient and outpatient setting.
- To monitor patients on an ongoing basis, to evaluate outcomes and adjust nursing care practice to ensure optimum co-ordination and delivery of care.
- To evaluate and develop professional scope of practice through ongoing evaluation and monitoring of the role of the CNS.
- To attend multidisciplinary meetings and ward rounds and participate in team discussions regarding treatment needs as appropriate.
- Contribute where appropriate in formulating or updating policies and procedures, which comply with agreed best practices.
- Work with the multidisciplinary clinical team to meet the needs of patients and their families.
- The post holder may be required to cover his/hers renal nurse colleagues during periods of leave.
- Evaluate clinical problems in conjunction with the medical team; co-ordinate investigation, therapy and patient follow up.
- In collaboration with medical colleagues, ensure that patients are fully assessed and treated accordingly with regard to renal anaemia management and Hepatitis B Vaccination.
- Demonstrate vision, innovation and flexibility in nursing practice.
- Formulate discharge plans, which ensure continuity of patient care by liaising with other professionals in the hospital and community.
- To work in collaboration with the community care and primary care services offering specialist advice and develop education programmes.

Patient/Client Advocate

- Ensure that regard is taken to the dignity, choices, self-esteem and well-being of patients and their relatives.
- In collaboration with patients, take available opportunities to represent views of and negotiate on behalf of individual patients/patient groups at a multidisciplinary level and with other personnel or agencies as appropriate.
- Play a central role in directing patients to specialist advocacy services as appropriate.

Education and Training

- To provide a high level of professional and clinical leadership and to demonstrate innovative practice in the provision of care in line with the Scope of Professional Practice and service needs.
- Develop and facilitate education and support programmes, for patients and their families and professional staff.
- To participate in undergraduate and postgraduate nursing programmes as requested.
- Ensure patients and staff have access to relevant education material, and develop new material as required.
- Assist in training members of the multidisciplinary team in changes in practice in the delivery of care including the provision of ward based teaching.
- Use relevant educational opportunities to maintain the highest standard of care to CKD patients.
- Raise awareness regarding the benefits of treatment through health promotion.
- Organisation and training of incoming staff, both medical, nursing and clerical.

**Audit and Research**
- Maintain awareness within the speciality of current developments in Nephrology nursing care.
- To establish, implement and evaluate audit programmes of the service, the quality of patient care and the CNS current practice, in line with local and regional developments, to include monitoring and evaluation of educational and health promotion programmes as relevant.
- To identify areas of practice for evaluation and evaluate current practice and improved methods of care against current peer reviewed research findings. Disseminate research findings to Nursing colleagues, Nurse Managers and the multidisciplinary team.
- Use research findings to influence care within the speciality.
- Ensure that accurate documentation and record keeping is maintained.
- Maintain awareness of, and participate as appropriate in multidisciplinary research projects.
- Develop a system for recording clinical activity.
- Participate in maintenance of service databases as appropriate.
- Provide updates of service reports to Nurse Manager and Consultants and produce an Annual report for the Hospital.

**Consultant**
- Provide specialist knowledge, expertise and care, in liaison with the multi-disciplinary team.
- Actively participate in the education and development of nurses and healthcare professionals in *Nephrology* on a hospital and community basis.
- To establish and standardise clear communication channels for referrals and consultations, inter and intra-disciplinary.

*The above Role Profile is not intended to be a comprehensive list of all duties involved and consequently the post holder may be required to perform other duties as appropriate to the post which may be assigned to him/her from time to time and to contribute to the development of the post while in office. This Role Profile will be subject to review in the light of changing circumstances.*

---

**Academic/Professional Qualifications and/or Experience Required:**
