

Say hello to mproHealthcare

We are excited to introduce the new and improved home treatment scanning app for people on home treatment with clotting factor concentrate. All users can download **mproHealthcare** from the Apple App Store and Google Play store.

The goal is to provide users with improvements to the app which will make the experience easier and more useful. All of the current functions remain and the following new features have been added

Treatment Recording: New option to record treatments pre & post procedure/surgery

Diary Function: Set up reminders & alerts for when your home treatment is due

View treatment data: - View your scanned treatment data

For Hemlibra patients: Keep a record of injection site locations used

Stock Information: View & manage your home treatment stock

Recording a bleed: Distinguish between new and existing bleeds

To continue scanning your treatment, it is important that you download the new app **mproHealthcare.**

Your local Treatment Centre Team are on hand to help with any queries or issues that you may encounter.

Thank you for your continued use of the home treatment scanning app. We welcome your feedback and comments as we move to **mproHealthcare**

Please check out the User Support Videos and user guide below for the **mproHealthcare** app
