

SJH Tracheostomy Passport

- The SJH Tracheostomy CNS team, in collaboration with our Tracheostomy patients and the Design Innovation lab, have launched Ireland's first Patient Tracheostomy Passport in April 2023.
- The initiative was undertaken to have all patient's relevant tracheostomy details on one document. It stays with the patient, and therefore can be accessed by patients, family members and health care professionals.
- This patient-centred quality initiative aims to empower patients in their own care, facilitating clear communication of key information across hospital and community settings.
